

HOTEL LOCK

SMX-HL1000

IC Card & Magnetic Card Lock

Front view

SMX-HL1000 series hotel locks are carefully designed and engineered to provide the modern hotels requirements such as, elegant design, high-Technology, maximum security, low maintenance costs and much more.

SMX-HL1000 cards (IC card or Magnetic card), are easy to operate and low in cost. These cards can promote hotel logo widely by guests.

Rear view

A complete set consists of: Locks, keycards, query cards and, check in/out station (including PC, Software, Encoders). There is no wiring between locks and check in/out station(s). All cards would be encoded via the encoder and software. This means that cards are actually a media which passes data to/from locks. All modifications, adding or deleting on a card will be done at the hotel check in/out station.

Features

- ✓ Multi-purpose card can be developed from magnetic card to support lock system and hotel facilities
- ✓ Complete key card management system includes 14 function cards and 5 management levels.
- ✓ 864 unlocking records can be stored in flash memory of the lock.
- ✓ Long beep alarm will warn the guest or waiter, when the latches of the lock is maliciously operated or the door is not closed properly.
- ✓ Micro-CPU located in back body
Reading-CPU located in front body and it's modular design, guarantee stable running and easy maintenance of the lock.
- ✓ Normal-open state can be set for meeting.
- ✓ As deadbolt draw out, LED will flash in red to show someone is in the room.
